Projects

Online Auction Platform

- In the fast-paced world of online auctions, our team embarked on a journey to transform the way buyers and sellers interact. Our project, an innovative Online Bidding/Auction Platform, seeks to redefine the auction experience by fostering transparency, enhancing engagement, and maximizing the value of listed items.
- Tools Used: Python, Django

Online Certification Management

- Our online certification management website is designed with both professionals and administrators in mind. The platform allows users to securely upload, manage, and track their certifications in one place, while providing admins with powerful tools to oversee team or organizational compliance. With its intuitive design and robust feature set, the website makes the process of certification management seamless and efficient for all users.
- Tools Used: Java, SpringBoot

Certifications

AWS Certified Cloud Practitioner

Red Hat Certified Enterprise Application Developer
